

ONE ECI

Emerson Impact Partner

YOUR MOST SUCCESSFUL PATH IS ONE THAT DELIVERS THE SOLUTIONS AND EXPERTISE YOU NEED, WHERE AND WHEN YOU NEED IT, AND FROM ONE ACCOUNTABLE SOURCE.

Streamlining operations and identifying a single point of accountability – backed by experience in your industry and the subject matter expertise you require – can create a significant advantage for you.

At ECI, we understand this advantage. We are committed to being a partner that delivers a comprehensive matrix of expertise and solutions designed to deliver successful business outcomes every time.

For you this means a single call to access a range of product and service solutions supported by engineering, technical expertise, and teams trained and ready to assist you throughout the lifecycle of your critical automation assets.

One Partner
Invested in
Your Success

Through a range of product and service solutions, ECI can meet all of your automation needs. This approach ensures that you have access to all of your automation needs from a single, trusted source. From product specification and project engineering to fabrication, installation, predictive/preventative maintenance and outages, ECI manages the day-to-day coordination of services so that you can focus on your core business.

With access to best-in-class products and services, engineering and training, you can optimize performance and operate with the support of our team every day.

Flow Control Solutions – Industry leading Fisher™ control valves, instrumentation and engineering application support

Process Systems & Solutions – Improve your operations with world-class Emerson™ DeltaV™ automation systems that enhance process performance while reducing engineering and lifecycle costs and providing unprecedented flexibility and adaptability

Engineering Services – From valve sizing to control system design, power system analysis and project management, engineering services and solutions help drive productivity and efficiency with the goal of delivering the business outcome you desire

Remote Automation Solutions – Design and installation of high-performance measurement, automation and control strategies for the oil and gas industry

Isolation & Valve Actuation – A range of isolation and valve actuation solutions from the leading brands such as Emerson's Keystone™, Vanessa™, KTM™ and Clarkson™

Pressure Management – Pressure and safety relief valve solutions from Emerson combined with ECI's National Board certified assembly, testing and repair capabilities

Lifecycle Services – Multiple Service Centers throughout our territory, factory-trained technicians and engineers prepared to support the lifecycle of all of your automation assets

Qual-Tech Engineers – A division of ECI, Qual-Tech is a leader in power system engineering, arch flash analysis and electrical engineering

Control Panel Design & Fabrication – ECI's Panel Shop designs and builds custom process control panels, delivering precision and accuracy through automated drilling, tapping and milling with a Steinhauer ModCenter machine

Skid Technologies – Custom prefabricated process control skids designed and built to your specifications for a variety of applications

Pump Solutions – Industry-leading pump brands and complete pump repair and service solutions, system configuration and skid fabrication

Reliability Solutions – Predictive maintenance, vibration monitoring and equipment health analysis designed to deliver seamless operations and help plants achieve maximum capacity and minimize downtime
