QUICK SHIP BALL VALVES

YOUR OPERATIONS DEPEND ON RELIABLE, CONSISTENT PRODUCTION.

Unplanned downtime, unanticipated maintenance and production stoppages need to be addressed quickly. When an isolation valve fails, the right solution is straight forward, provided the products you need are readily available.

Quality Valves,
Expert Assemblies and
Expedited Delivery

Inventory Availability to Address Your Needs

The ECI Quick Ship Ball Valve program is your solution. We understand the critical role of ball valves in consistent processes and production lines. Our commitment to maintaining inventory and expertise within territory enables a high quality, expedited response to your ball valve needs.

KTM Ball Valve Assemblies Delivered in Five Business Days

KTM ball valves come in a range of sizes and materials, with EI-O-Matic actuators and accessories are available for local assembly and delivery in five business days. Quick quoting, accessible inventory and in-territory service centers and technicians create the response you need to keep your operations running.

Whether you are completing scheduled repairs, stocking spares or experiencing downtime from unplanned maintenance, expedited response can significantly impact operations. Replace failed valves quickly with high quality valve assemblies that meet your specifications. The result is less downtime and faster return to normal operations

Contact your ECI Account Manager to request your quick ship ball valves!
